

PRODUCT DATA SHEET n° 5

TRAPEZOIDAL SECTION
with anti-stretch side reinforcement
Hardness 40 SH

Contatto a sezione trapezoidale con protezioni inox superiore antiusura
e inox laterale anti-allungamento

Guaranteed minimum performance characteristics	
Passing speed of vehicles:	0 ÷ 80 km/h
Activation Pressure:	10 ÷ 25 kg/cm ²
Activation speed:	< 1ms @ 12V
Downtime:	> 1 ms
Operating Ambient Temperature:	-30 ÷ 60° C
Electrical resistance of the sensor at rest:	> 500 MΩ
Product Life Period:	1 year or 2 million passes

Conditions to be met in order to guarantee the minimum life period of the product:

1. During installation and operation, the sensors should not be punctured or damaged with sharp objects.
2. The pull of the cable must not exceed 20kg.
3. The entire flat part of the sensor head must be protected by a sheet of steel.
4. During operation, the holder under the sensor must always be kept clean to prevent it from breaking.
